**Through The Darkness**

### **Another Shadow**

**Don't waste my time talking about tomorrow  
Don't waste my time talking about past  
Don't try to tell me whom I just have to follow  
Don't even try to make me live fast**

**Fallow my way I cast another shadow  
Leaving behind all that has gone  
I walk the skies touching the stars around me  
And my shadows will die under the sun**

**All that I've done is just another shadow  
It is not me I left it behind  
So don't waste your time trying to put together  
Me and my shadows they are just gone**

## Immortal Bride

She's like a tale without end  
She lives in her fantastic land  
Her smile is like the rising sun  
I know she never will be gone

She speaks to me all over night  
And she is soft like evening shadow  
She always be immortal bride  
Who calls me standing in the meadow

She dresses in the dark and light  
But in her eyes so many sorrow  
But you will never see her cry  
You'll see her watching for tomorrow

Her world is hidden from the eyes  
She dances, sings but not for people  
She's sick and tired from human lies  
And only chosen ones can see her

## Absurd Game

Fall deep inside the rabbit's hole  
There are no rules in this long fall  
The images rush through your brain  
You are the one who starts the game

The house of cards is falling down  
Behind the wall there is a town  
But door is locked there's no key  
Don't look for answers inside me

You have to play this absurd game  
And it is making your insane  
Reality becomes a dream  
You cut it with your own scream

You see the smile without cat  
And you don't have your own hat  
You want come back but you don't know  
The way that leads you to the home

Don't lose your head before the queen  
Forget it like the awful dream  
Insanity becomes alive  
Your only goal is to survive

## Insects In The Amber

See how the days are passing by  
Remember all of them just try  
Now you can travel through your past  
Before your body turns to dust

We are like insects in the amber  
In the hands of fate  
We are like insects in the amber  
We'll draw together in the sand  
In the end

See how the years pass away  
Grab all the moments on this way  
And build your citadel of dreams  
And bury there all your fears

## The Nameless Ghost

Deserted graveyard near house  
That stays without life for yeas  
It used to be asylum ones  
And shadow of the past appears

The number is instead your name  
Carved on headstone above your grave  
And only wish is to return  
To living ones and find your home

And people hear your voice sometimes  
When you cry out for redemption  
They see your face when daylight dies  
But they don't really pay attention

You are condemned to walk alone  
Through corridors of dying building  
But people can not hear your call  
The nameless ghost stands at the window

The years of waiting slowly pass  
And grave is hidden under grass  
But you're still hoping to return  
To living ones and find your home

## Think Yourself

We are too blind to see the truth  
And we waste our own youth  
We are too slow to catch the days  
And we lost our own ways

Jump into abyss drown in skies  
And free yourself from all these lies  
This world is not good as it seems  
So pour yourself into your dreams

We are too scared to be alone  
And we leave our own home  
We are too weak to be against  
So we are just a time waste

But all of us have one more chance  
To find romance behind gray days  
Just look into yourself and find  
The worlds unknown to mankind

## Insanity

The world of sense is left behind  
In your bizarre unknown ride  
You don't remember anything  
Now you are living in your dream

They want you to return  
And live like all they do  
But you don't hear them  
And they can't follow you  
None can understand  
What hides behind your eyes  
They think it is the end  
But you don't hear their lies

Your world's unseen but it is real  
You live in it, it is your realm  
But everyone rejects to see  
In your insanity you are free

## Behind The Wall Of Sleep

Just close your eyes, relax and fall in dream with me  
Don't be afraid to feel don't be afraid to see  
Just leave your body in the bed so far behind  
And you will see my friend the darkness and the light

Behind the wall of sleep the shadows dance and sing  
Behind the wall of sleep the bells unknown ring  
There's the gate to stars behind the wall of sleep  
And you are falling down in abyss that so deep

Don't be afraid my friend this does not mean the end  
You'll see the truth in dreams and you will understand  
Just close your eyes and see the worlds behind the veil  
And every night my friend you can see them again

## Seek And Hide

I start this game before sunrise  
I start to count I close my eyes  
You have the whole day just to hide  
Before the moon will shine so bright

We play the game of seek and hide  
My prize is blood your prize is life  
We have all night to play this game  
But it will never be the same

I look for you when darkness falls  
I can't see you but your smell calls  
And moon tonight is shining bright  
And this is game of seek and hide

My prize is blood you've lost your life  
In this old game of seek and hide  
We have all night to play this game  
But it will never be the same
